

Corrections to map:

- ❑ John King Blvd is not State Highway 205, though it is sometimes referred to as the 205 bypass.
- ❑ Though John King Blvd is a 4-lane road, it is a city street which crosses over the state roads of 66, 1141, and 552 which all have the right of way. Traffic on John King Blvd must stop and yield.
- ❑ John King Blvd does not connect with I-30 at this time. That is a future plan. So taking the 205 exit from I-30 is the best way to get to John King Blvd using several cross street options, including Route 66 a block before reaching the downtown square.
- ❑ Quail Run Rd is not anywhere marked as FM 1152.
- ❑ Access from 205 [N. Goliad] at CVS will not be complete until sometime in August 2010.
